Goals of Intervention

- ▲ Build Trust
- ▲ Promote a positive orientation through nurturing self-esteem and hope
- ▲ Promote client control
- Affirm and promote client strengths
- ▲ Set mutual health directed goals

Using Modeling & Role Modeling

- ▲ Unique Individual and the nurse work together and create a mutual plan of care.
- ▲ The nurse creates interventions, implements and evaluates them.

Unique Individual has depleted resources both internal and external

Continued "stressors" bring Unique Individual to University Health System

"My model of the world must be used to create a mutual plan of care."

—Unique Individual
