Current State: Dose can be changed and Indication optional.
Future State: Dose can not be changed and Indication is required.
In order to give multiple bottles, choose a frequency and duration.
Future State: Alert Message if not ordered by or on behalf of faculty.

FORMULARY ALERT: Albumin (Human) 25% 100 mL Inj is a NON-FORMULARY or RESTRICTED drug and can be ordered only by faculty members. If the patient needs this drug emergently, click the <Go Back> button and then use the <Requested By Other> option on the top of the order entry form to pick the name of your supervising faculty. That faculty person will be required to co-sign the order at a later time. Although non-formulary drugs are available when the patient is in the hospital, please keep in mind that non-formulary drugs are NOT available from UHS pharmacies after discharge.

Future State: Alert message if no indication entered.

The Indication for Use may not be left blank. Please enter a value into the field.
