

**Do not give NSAIDs including ibuprofen or ketorolac.**  
**No IM injections. Give Clotting Factor before invasive procedures.**

## Contact

Contact Hematologist on call:  
- Pediatrics 210-529-2567  
- Adults 210-203-9684

## Rapid Triage

- Brief history including: Mechanism of injury (trivial, mild or significant head trauma), LOC, localized symptoms-headache, nausea, vomiting, hematoma
- Exam to include: Vital Signs, GCS, degree of pallor and cardiopulmonary status

## Laboratory

- STAT CBC with differential with placement of IV or port access if concern for hemorrhage
- No indication for PTT unless checking response to factor dose
- If extreme pallor: type and screen

## Imaging

- \*CT Head STAT without contrast to evaluate for hemorrhage in case of head trauma
- Other imaging per site of trauma

## Clotting Factor

- **Do not give FEIBA to Hemlibra® patients**
- Access port or place IV
- Use butterfly if unable to place IV
- Use Home Factor if available
- NovoSeven 90 mcg/kg

## Disposition

- Disposition per Hematology
- Admission criteria: CNS hemorrhage, altered mental status

\*Suspected CNS Injury.
