

## Lipid Selection in Neonates and Infants (Neonatology Service) Algorithm

\* Consider the following labs:

- Prior to starting Omegaven®: complete blood count, prothrombin time (PT), activated partial thromboplastin time (PTT), chemistry, liver function tests (LFTs), gamma-glutamyl transferase (GGT), triglycerides (TGs), direct bilirubin
- Weekly: CBC, chemistry, LFTs, GGT, TGs, direct bilirubin, (Coags only if clinically indicated for bleeding)

## Discontinuation of Omegaven® in Neonates and Infants (Neonatology Service) Algorithm

\*Weight gain definition: Average weight gain is <1% of body weight in grams per day for 2 weeks and falling below growth curve
